Question:	Comments:
Response Rate:	**50.00**% (**6** of **12**)

1	he was down right amazing and should get a raise have yet to have a better math professor or professor yet -allie p
2	You know the material extremely well, and I appreciated that you were willing to explain concepts fully before moving on and that you were always available for additional help.
3	You are the best math professor in the University of Arkansas. You kept the class interesting. Good luck and I wish you the best.
4	This is by far the best class I have taken at the U of A. Dr. Castro is the most approachable professor I have ever had and he is always willing to help a student understand the concepts of the class. His office hours are definitely helpful when you need a little more help to grasp the concepts of this class. Overall, great professor!
5	Linear Algebra was a class that I always dreaded the thought of taking. Thankfully Dr. Castro taught in a way that made difficult concepts easy to comprehend, which made the experience enjoyable rather than a struggle. Throughout the course he demonstrated his mastery of the subject and his passion to educate. This course was a pleasure taking thanks to him.
6	He is a great professor. This is my second time taking this class and I have 1000% improved and am actually understanding the material. Dr. Castro is one of my favorite professors and I'm so glad I took his course. The only thing I would suggest to do differently is to be more active in blackboard such as keeping up with grades
